Thank you for purchasing the Avidyne MLX770 Worldwide Datalink Transceiver.

**MLX770 FEATURES**

The MLX770 Datalink Transceiver communicates with the Avidyne Network Operations Center (NOC) over the worldwide Iridium satellite network and provides weather data and text messaging to compatible displays. Weather products and services will vary from one region of the world to another. Certain features may not be available on all displays. Refer to the pilot guide for your display to learn about the MLX770 features supported on that display.

Avidyne plans to add new features, such as additional weather products and text services, to the NOC on a continual basis. These features will then be available via the MLX770 transceiver to the display.

NOTE: SMS Messaging over the Iridium satellite network is most reliable when sending messages to an e-mail address. Because of interoperability issues between Iridium and certain mobile phone service carriers, SMS messages from the MLX770 to phone numbers may be delayed or may never arrive. Avidyne makes no claims as to the reliability of the SMS text messaging function.

NOTE TO CUSTOMERS IN EUROPE: If text messaging is available on your display, EASA requires that the text messaging feature not be used by the pilot flying.

### GENERAL SAFETY CAUTIONS

The weather data received and displayed on moving maps from the MLX770 receiver is only advisory in nature. Do not rely on the MLX770 Iridium Datalink Transceiver as the sole source of weather avoidance information. Always obtain a thorough weather briefing from an officially recognized source.

Due to datalink weather transmission delays, use datalink weather information only for strategic route planning. Avoid severe weather areas with a safe margin of distance. Do not use MLX770 Iridium Datalink Transceiver to penetrate severe weather, thunderstorms, cells, or lines of cells. By using datalink, you can access weather information made available from sources external to Avidyne Corporation. Avidyne does not control, edit or review the content of such information and is not responsible for such information or the actions or conduct of any company that provides sources of weather data through the datalink. Therefore, ALL WEATHER DATA IS PROVIDED AS-IS and neither Avidyne nor its suppliers, subcontractors, or developers (collectively called "Suppliers") are responsible for: 1) the accuracy, completeness, timeliness, reliability, content, or availability of the weather data or any other datalink information accessed; 2) loss or damage to your records or data; or 3) your use of, or results achieved from, the weather data or any other information accessed.

US NOTAM information is subject to constant change, and it is extremely important that all US pilots check with Flight Service for applicable NOTAMS prior to EVERY flight. Call 1-800-WXBRIEF (992-7433) for the latest information. Outside the United States, call your local flight service or other official flight advisory service. The NOTAM information provided by the MLX770 Iridium Datalink Transceiver is for planning purposes only. Always consult official NOTAMS for the latest restrictions.

Avidyne does not provide a complete list of NOTAMS. Local NOTAMS, most laser light NOTAMS, and any NOTAMS other than restricted airspace are not listed. By using the Avidyne Services you are able to access information made available from a variety of sources. Avidyne does not control, edit or review the content of such information and is not responsible for such information or the actions or conduct of any company that provides sources of weather data procured by Avidyne. Therefore, although Avidyne uses diligent efforts to provide Services of high quality, ALL SERVICES AND WEATHER DATA ARE PROVIDED AS-IS and neither Avidyne nor its suppliers (including WSI, Iridium and any of their affiliates), subcontractors, information sources or developers (collectively called "Suppliers") are responsible for: 1) the accuracy, completeness, timeliness, reliability, content, or availability of the Services or any information accessed; 2) loss or damage to your records or data; or 3) your use of, or results achieved from, the Services or any information accessed.
